Application No.: 09/658,045 Docket No.: W1878.0163/P163

AMENDMENTS TO THE SPECIFICATION

Replace the paragraphs at page 22, line 16, through equation at page 23, line 1 as follows:

Excitation signal restoring circuit 2610 receives, as its input, the $\frac{\text{smoothed gain [g_{exc}(j), j=0, ..., (N_{sfr} \cdot N_{sefr}-1)] from smoothing circuit 1320 and the }{\text{shape vector } \left[e\frac{(m)}{(exc)}(i), i=0,...,(L_{sfr}/N_{ssfr}-1), j=0, ...,(N_{sfr} \cdot N_{ssfr}-1)\right] from excitation }$

signal normalizing circuit 2510, calculates a smoothed excitation vector with the following equation, and outputs the excitation vector to storage circuit 1240 and to synthesizing filter 1040:

$$\frac{\hat{\mathbf{x}}}{\text{exc}} \frac{(m)}{N_{\text{ssfr}}} + i = g_{\text{exc}} (m \cdot N_{\text{ssfr}} + 1) \cdot s \frac{(m \cdot N_{\text{ssrf}} + 1)}{\text{exc}} (i)$$

signal normalizing circuit 2510, calculates a smoothed excitation vector with the following equation, and outputs the excitation vector to storage circuit 1240 and to synthesizing filter 1040:

$$\hat{x} \frac{(m)}{exc} \left(I \cdot \frac{L_{sfr}}{N_{ssfr}} + i \right) = \overline{g}_{exc} (m \cdot N_{ssfr} + 1) \cdot s \frac{(m \cdot N_{ssrf} + I)}{exc} (i)$$
